EDUCATION

Btech., Information Technology, Dharmsinh Desai University

CGPA-9.01

Nadiad, Gujarat, India

2021 - 2025

St. Mary's School

HSC and SSC

Dahod, Gujarat, India

2019 - 2021

TECHNICAL SKILLS

Core Skills: DBMS, OOPS, DSA, SDLC, REST API

Programming Languages: Java, SQL, C++, Python, JavaScript, TypeScript, HTML, CSS

Libraries and Frameworks: Pandas, Numpy, Scikit learn, TensorFlow, Keras, Matplotlib, ReactJS, SpringBoot, SpringMVC, Hibernate

Technologies: Kubernetes, Docker, Web development, Blockchain(beginner), Web Scrapping

Tools: VS Code, IntelliJ IDEA, GitHub, Postman, Linux, Figma, Eclipse, NetBeans, pgAdmin

Open Source Contributions: GirlsScript Summer Of Code

EXPERIENCE

Trainee Engineer

Simform

Jan, 2025 - present

- Developed hands-on experience with modern web technologies such as **Git, JavaScript, TypeScript, React, and Next.js, contributing to real-world use cases.**
- Focused on writing **clean, maintainable code** while learning best practices for **code quality, version control, and team collaboration**; enhanced soft skills through regular communication and teamwork.

POSITION OF RESPONSIBILITY

Management Head

Computer Society Of India, Student Branch, DDU

2022 - 2024

- Joined CSI-DDU as a junior associate. Played a pivotal role in **organizing numerous technical events** on campus.
- Subsequently promoted to Management Head, **leading a team of 18** individuals. My involvement with CSI significantly enhanced my **communication, leadership, teamwork, and cooperation** skills.
- Additionally, it fostered an interest in technical writing.

PROJECTS

- **Placement recommendation system** [Visit](#)
 - Tools and Technologies used: NextJS, Python, Flask.
 - Led the development of a platform enabling students to **predict ideal companies** for employment.
 - The platform offers a seamless experience for **job applications**, access to a comprehensive **list of available positions** and enables **recruiters to post job listings**.
- **VoiceLang** [GitHub](#)
 - Tools and Technologies used: Python
 - VoiceLang is a **voice-controlled programming language** tailored for mathematical computations. It leverages speech recognition to **interpret spoken commands**, enabling users to **perform calculations seamlessly through voice input**, offering a novel way to interact with mathematical operations.
